MAZIYAR HABIBKHODA

SENIOR PRODUCT DESIGNER

Product Strategy | Complex Products | UX Architecture | Design Systems

PROFILE

Senior Product Designer with 12+ years of experience shaping complex digital products across healthcare, insurance, banking, and e-commerce. Combines strategic problem framing with hands-on design of multi-sided services and enterprise workflows. Currently the sole designer for an insurance and healthcare ecosystem serving 250K+ monthly active members, 300+ specialists, and 6K+ contracted healthcare centers.

PROFESSIONAL EXPERIENCE

Komak Resan

Senior Product Designer | Sep 2025 - Present

Sole Product Designer for a multi-sided insurance and healthcare ecosystem connecting insurers, providers, members, specialists, and operations teams.

- Led a specialist document-scanning workflow redesign from web to native mobile, reducing the process from five steps to three. Comparative usability testing with 14 operations specialists (two groups of seven, each with two more experienced and five less experienced participants) showed that participants completed the scenario successfully about 20% faster. The feature is published for specialist use and received positive qualitative feedback.
- Analyzed existing operational data and defined a Business Intelligence reporting experience to turn underused information into management insights, including role-based dashboards, KPIs, trends, historical comparisons, visual analytics, and clearer query building. Senior leadership approved the design; it is in development.
- Reorganized reporting information architecture around clear scopes, logical categories, and filters. Rewrote technical errors in plain language with contextual guidance and error-specific calls to action, helping users understand and resolve issues. This work is in development.
- Selected MUI to build on frontend engineers' existing expertise, then established a customized design system with foundations for typography, breakpoints, spacing, color, icons, and elevation, followed by design tokens and reusable components. The system is used across all new product designs.
- Proposed a shared Storybook, later built by the frontend team. Requested delaying document-scanning frontend development until the system and component kit were ready; with scope and team unchanged, frontend implementation was completed in three weeks, compared with the project manager's pre-system estimate of about two and a half months.
- Presented impact-informed proposals for unified services, SSO and role-based access, semantic search, AI-assisted workflows, and predictive analytics. Senior leadership approved them for the product backlog; implementation is pending.

Raya Niyaresh Kara

Product Designer | Apr 2025 - Sep 2025 | Contract, part-time

- Streamlined Qman, a digital-menu service, across subscription purchase, account management, and menu creation. A/B and usability tests with former users assessed task time and navigation friction, including dead ends and repeated confusion; results across these indicators showed an overall improvement of approximately 30%.

Asan Darman

Product Designer | Feb 2024 - Jun 2025

- Rebuilt the user experience for a released at-home medical services MVP, leading requirements discovery, interviews, surveys, A/B testing, workflows, user journeys, wireframes, and final UI. After launch, the app rating rose from approximately 2.4 to 3.5, and downloads increased.
- Replaced the legacy admin panel with a business-specific management experience. Usability testing with specialists and operators showed a 32% overall improvement, based on a composite of task completion speed and successful-operation rate.

Resalat Bank / Fardup

Senior UI/UX Designer | Jul 2021 - Nov 2023

- Mapped complex, interdependent service flows for M-Resalat, a super app supporting Resalat Bank's shift to fully digital banking. Created a more navigable experience for services previously scattered across mobile, phone, and internet banking; secured management approval and adapted the design as business requirements evolved.
- In a dedicated user survey about ease of access to banking services, the rating increased from 3.2 to 4.5 out of 5 between the old and new experience. Mentored junior designers and interns.

Salmode

Senior UI/UX Designer | Jan 2020 - Jul 2021

- Rebranded Salmode and redesigned its e-commerce website. Online sales increased by 20% compared with the pre-redesign period.
- Created a custom icon set and refined product experiences through research and usability work.

INDEPENDENT PRODUCT DESIGN PRACTICE | 2012 - 2020

Primary independent projects across insurance, healthcare, e-commerce, and service design: Karen Up (insurance app from 0 to 1), Roshana Lighting & Decor, Kerman Theater, Paplos Fast Food, Bagh Store, and Kerman Pistachio Export.

SELECTED CONTRACT PROJECTS | 2024 - 2025

Artpay (credit platform for artists); Uneva (corporate website); Hezar Store (home-appliance e-commerce); Golfam (website redesign; the company reported an increase in customer calls after launch).

CORE EXPERTISE

Product Strategy, Product Discovery, End-to-End Product Design, UX Architecture, Information Architecture, Enterprise UX, B2B/B2C Products, User Research, Usability Testing, A/B Testing, Interaction Design, Service Design, Design Systems, Dashboards & Data Visualization, Stakeholder Management, Cross-functional Collaboration.

TOOLS

Figma, Figma AI, MUI, Material Design 3, Design Tokens, Storybook, FigJam, Miro, Hotjar, OpenAI, Claude, Adobe Illustrator, Adobe Photoshop, HTML/CSS, JavaScript (basic).
