PROFILE

Senior Product Designer with 12+ years of experience turning complex business, operational, and user problems into scalable digital products. I work across product strategy, UX architecture, information architecture, research, design systems, interaction design, and validation in complex B2B, B2C, healthcare, insurance, banking, and enterprise environments. I also use AI tools such as Figma AI, OpenAI, and Claude as part of my product design and problem-solving workflow.

Currently the sole Product Designer at Komak Resan, working across a multi-sided insurance and healthcare ecosystem serving 250K+ monthly active members, 300+ specialists, and 6K+ contracted healthcare centers. I work closely with executive leadership, product, engineering, support, and domain experts to turn ambiguity into actionable product decisions.

PROFESSIONAL EXPERIENCE

Komak Resan

Senior Product Designer | Sep 2025 – Present

- Sole Product Designer across a complex insurance and healthcare ecosystem connecting insurers, healthcare providers, insured members, internal specialists, and operational teams.
- Own product discovery, business analysis, UX architecture, information architecture, research, interaction design, design systems, usability evaluation, and product strategy.
- Established a scalable Design System based on Material Design 3, MUI, and design tokens.
- Led the transformation of a specialist document-scanning workflow from web to native mobile, reducing the core workflow from 5 steps to 3; usability testing showed approximately 20% faster task completion with the native workflow.
- Shaped the transformation of operational reporting toward Business Intelligence, including role-based dashboards, KPIs, historical comparison, visual analytics, and a more readable query-building experience.
- Defined strategic directions including unified services, SSO and role-based access, semantic search, AI-assisted workflows, and future predictive analytics.
- Worked with engineering to identify UX issues rooted in data structures, system constraints, and business logic; used stakeholder interviews, support data, analytics, Hotjar, expert sessions, usability testing, and heuristic evaluation to inform decisions.

Raya Niyareh Kara

Product Designer | Mar 2025 – Sep 2025

- Conducted user research and usability testing and designed product flows from wireframes to high-fidelity prototypes.
- Improved service-ordering workflows, with a reported 30% improvement in the Qmen process.
- Designed a client panel with dashboards, advanced features, and multi-level management.
- Provided UX consultation and helped translate business-process challenges into product improvements.

Asan Darman

Product Designer | Feb 2024 – Jun 2025

- Worked on healthcare product experiences from research and wireframes through high-fidelity design and validation.
- Reported 45% improvement in user satisfaction and 32% improvement in admin-panel usability through redesign and responsive improvements.
- Supported product discovery, usability evaluation, and business problem solving.

Resalat Bank / Fardup

Senior UI/UX Designer | Jul 2021 – Nov 2023

- Redesigned Em Resalat from a desktop-first experience toward responsive, mobile-first digital banking using Material Design 3.
- Conducted usability testing and UX consultation; reported 40% improvement in user access to products and services.
- Supervised design work and mentored junior designers and interns.

Salmode

Senior UI/UX Designer | Jan 2020 – Jul 2021

- Led digital rebranding and e-commerce redesign with a minimalist Material Design approach.

- Created a custom icon pack and improved product experiences through research and usability work.
- Reported 20% increase in sales following the redesign.

INDEPENDENT PRODUCT DESIGN PRACTICE

2012 – 2025 | Selected projects across insurance, healthcare, e-commerce, corporate, and service products.

- Artpay — credit-granting platform for artists.
- Uneva — corporate website for the central representative of Uneva products.
- Hezar Store — e-commerce platform for home appliances.
- Karen Up — insurance app designed from 0→1.
- Golfam — corporate/advertising website redesign with a reported 40% increase in engagement.
- Roshana Lighting & Décor, Kerman Theater, Pepples, Bagh Store, and Kerman Pistachio Export Company — selected web, e-commerce, and service design projects.
